JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 250 (1988)

SUBJECT INDEX

Ac response,
behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The ——— (Fleischmann, Pons) 277

Ad-atoms,
electrocatalysis by ———. Part XXIII. Design of platinum ad-electrodes for formic acid fuel cells with ad-atoms of the IVth and the Vth groups (Watanabe et al.) 117
Electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, Sb, Bi, S and Se) ——— (Shibata, Furuya) 201

Alkali hydroxides,
chemical and electrochemical behaviour in molten ———. Part II. Electrochemistry of chalcogenide ions in the molten NaOH + KOH (49 mol%) eutectic mixture (Claes et al.) 327

Aniline,
adsorption of ——— on gold: a SERS study (Holze) 143

Antimony,
electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, ———, Bi, S and Se) ad-atoms (Shibata, Furuya) 201

Bismuth,
electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, Sb, ———, S and Se) ad-atoms (Shibata, Furuya) 201

γ-Butyrolactone,
ion size evaluation for $LiClO_4$ solutions in selected mixtures of ——— with ethers (Werblan et al.) 165

Camphor-10-sulfonate,
two-dimensional nucleation according to an exponential law with diffusion-controlled growth in the adsorption of ——— at the mercury/electrolyte interface (Philipp et al.) 159

Carbon dioxide,
interaction of ——— with gold electrodes in acid electrolyte followed through voltammetry (Alonso et al.) 183

CE mechanism,
behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The effects of coupled chemical reactions: the ——— (Fleischmann, Pons) 285

Chalcogenide ions,
chemical and electrochemical behaviour in molten alkali hydroxides. Part II. Electrochemistry of ——— in the molten NaOH + KOH (49 mol%) eutectic mixture (Claes et al.) 327

Charge-accumulating devices,
development of redox-modified electrodes as ——— for use in higher sensitivity detection systems (Chambers, Walton) 417

Charged wall,
some general statistical-mechanical considerations on the entropy of a solvent monolayer or multilayer against a ——— (Guidelli, Foresti) 23

Charge transfer,
orbital-energy-resolved partial ——— in chemisorption and electrochemical processes on semiconductors (Lorenz, Rommel) 37

Charge transport,
self-doped conducting copolymers: a ——— and mass transport study of poly{pyrrole-CO[3-(pyrrol-1-yl)-propanesulfonate]} (Reynolds et al.) 355
Temperature dependence of ——— processes in surface deposited redox polymer layers (Lyons et al.) 207

Chemisorption,
orbital-energy-resolved partial charge transfer in ——— and electrochemical processes on semiconductors (Lorenz, Rommel) 37
Chronoamperometry,
behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. ——— (Fleischmann et al.) 269
Chronopotentiometry,
behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. ——— (Fleischmann, Pons) 257
Cobalt nitride,
reduction of oxygen to water on ——— thin film electrodes prepared by the reactive RF sputtering technique (Azuma et al.) 73
Cobalt tetraaza macrocyclic complexes,
correlation of heterogeneous electron transfer rates with structural change in ——— (Feng, Schultz) 107
Computer automation,
——— of Polarographic Analyzer PAR 384B and development of specific implementation software (Pižeta, Branica) 293
Conducting copolymers,
self-doped ———: a charge and mass transport study of poly{pyrrole-CO[3-(pyrrol-1-yl)propanesulfonate]} (Reynolds et al.) 355
Copper,
electrochemical behavior of cytochrome *c* at a gold electrode modified by various (———, Sn, Sb, Bi, S and Se) ad-atoms (Shibata, Furuya) 201
Electrode kinetics of the ———(II)/Cu(I) system at platinum in water + dimethylsulphoxide (DMSO) mixtures (Małyszko, Scendo) 61
cis-Cyclooctene,
epoxidation of ——— by molecular oxygen electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes (Moisy et al.) 191
Cytochrome *c*,
electrochemical behavior of ——— at a gold electrode modified by various (Cu, Sn, Sb, Bi, S and Se) ad-atoms (Shibata, Furuya) 201

Detection systems,
development of redox-modified electrodes as charge-accumulating devices for use in higher sensitivity ——— (Chambers, Walton) 417
Digital simulations,
on the use of the Saul'yev algorithms in ——— of electrochemical processes (Marques da Silva et al.) 457
Dimethylsulphoxide,
electrode kinetics of the Cu(II)/Cu(I) system at platinum in water + ——— (DMSO) mixtures (Małyszko, Scendo) 61

Electron transfer,
correlation of heterogeneous ——— rates with structural change in cobalt tetraaza macrocyclic complexes (Feng, Schultz) 107
Electroanalytical simulations. Part IX. The simulation of a second-order chemical reaction preceding a reversible ——— under cyclic voltammetric conditions using orthogonal collocation (Hertl, Speiser) 237
Entropy,
some general statistical-mechanical considerations on the ——— of a solvent monolayer or multilayer against a charged wall (Guidelli, Foresti) 23
Ethers,
ion size evaluation for $LiClO_4$ solutions in selected mixtures of γ-butyrolactone with ——— (Werblan et al.) 165

Formic acid,
electrocatalysis by ad-atoms. Part XXIII. Design of platinum ad-electrodes for ——— fuel cells with ad-atoms of the IVth and the Vth groups (Watanabe et al.) 117

Glassy carbon,
effect of pulsed laser irradiation on the properties of ——— electrodes (Štulík et al.) 173
In-situ IR study of adsorption and oxidation of methanol on platinum and platinised ——— electrodes in sulphuric acid solution (Christensen et al.) 127
Gold,
adsorption of aniline on ———; a SERS study (Holze) 143
Determination of experimental parameters in the Fe(III)/Fe(II) system in 1 *M* H_2SO_4, with a polycrystalline ——— electrode, taking advantage of its non-linear behaviour (Duo et al.) 321
Electrochemical behavior of cytochrome *c* at a ——— electrode modified by various (Cu, Sn, Sb, Bi, S and Se) ad-atoms (Shibata, Furuya) 201

Electrochemical separation of the inner monolayer in methylene blue/leucomethylene blue conductive films induced by a sulphur-modified ——— surface (Clavilier et al.) 427
Electro-oxidation of thiosulphate ion on ———. Study by means of cyclic voltammetry and Auger electron spectroscopy (Pedraza et al.) 443
Interaction of CO_2 with ——— electrodes in acid electrolyte followed through voltammetry (Alonso et al.) 183

Hexachloroiridate,
chronocoulometric and rotating disc electrode determination of the charge propagation current through poly-4-vinylpyridine films containing ——— anions (Lindholm) 341
Hydrogen,
elimination of the influence of interfering ions in the voltammetry of catalytic ——— evolution in the presence of platinum salts (Korolczuk) 411

Ion transfer,
on the nature of the transfer coefficient for ——— reactions (Fawcett, Foss, Jr.) 225
Iron,
determination of experimental parameters in the ———(III)/Fe(II) system in 1 *M* H_2SO_4, with a polycrystalline gold electrode, taking advantage of its non-linear behaviour (Duo et al.) 321
Isonicotinic amide,
electrochemical reduction of ——— in a strong acid medium (Marín Galvín, Rodríguez Mellado) 399

Laser,
effect of pulsed ——— irradiation on the properties of glassy carbon electrodes (Štulík et al.) 173
Leucomethylene blue,
electrochemical separation of the inner monolayer in methylene blue/——— conductive films induced by a sulphur-modified gold surface (Clavilier et al.) 427
Lithium perchlorate,
ion size evaluation for ——— solutions in selected mixtures of γ-butyrolactone with ethers (Werblan et al.) 165

Manganese porphyrin,
eopoxidation of *cis*-cyclooctene by molecular oxygen electrocatalysed by polypyrrole–——— film modified electrodes (Moisy et al.) 191
Mass transport,
behavior of microdisk and microring electrodes. ——— to the disk in the unsteady state. Chronoamperometry (Fleischmann et al.) 269
Behavior of microdisk and microring electrodes. ——— to the disk in the unsteady state. Chronopotentiometry (Fleischmann, Pons) 257
Behavior of microdisk and microring electrodes. ——— to the disk in the unsteady state. The ac response (Fleischmann, Pons) 277
Behavior of microdisk and microring electrodes. ——— to the disk in the unsteady state. The effects of coupled chemical reactions: the CE mechanism (Fleischmann, Pons) 285
Self-doped conducting copolymers: a charge and ——— study of poly{pyrrole-CO[3-(pyrrol-1-yl)propanesulfonate]} (Reynolds et al.) 355
Mercury,
two-dimensional nucleation according to an exponential law with diffusion-controlled growth in the adsorption of camphor-10-sulphonate at the ———/electrolyte interface (Philipp et al.) 159
Methanol,
enhancement in ——— oxidation by molybdenum modification of Pt–SPE electrodes (Wang et al.) 213
In-situ IR study of adsorption and oxidation of ——— on platinum and platinised glassy carbon electrodes in sulphuric acid solution (Christensen et al.) 127
New in-situ IR results on adsorption and oxidation of ——— on platinum in acidic solution (Iwasita, Vielstich) 451
Nitrogen fixation. Part I. Nitrogen reduction by electrochemically generated vanadium(II) promoted by various organic ligands in basic ——— (Becker, Posin) 385
Methylene blue,
electrochemical separation of the inner monolayer in ———/leucomethylene blue conductive films induced by a sulphur-modified gold surface (Clavilier et al.) 427

1-Methyl-4-phenylpyridinium,
reaction between ——— (MPP^+) and superoxide anion in acetonitrile (Oturan et al.) 83
Microdisk electrodes,
behavior of ——— and microring electrodes. Mass transport to the disk in the unsteady state. Chronoamperometry (Fleischmann et al.) 269
Behavior of ——— and microring electrodes. Mass transport to the disk in the unsteady state. Chronopotentiometry (Fleischmann, Pons) 257
Behavior of ——— and microring electrodes. Mass transport to the disk in the unsteady state. The ac response (Fleischmann, Pons) 277
Behavior of ——— and microring electrodes. Mass transport to the disk in the unsteady state. The effects of coupled chemical reactions: the CE mechanism (Fleischmann, Pons) 285
Microelectrode,
theory of ——— voltammetry with little electrolyte (Oldham) 1
Microring electrodes,
behavior of microdisk and ———. Mass transport to the disk in the unsteady state. Chronoamperometry (Fleischmann et al.) 269
Behavior of microdisk and ———. Mass transport to the disk in the unsteady state. Chronopotentiometry (Fleischmann, Pons) 257
Behavior of microdisk and ———. Mass transport to the disk in the unsteady state. The ac response (Fleischmann, Pons) 277
Behavior of microdisk and ———. Mass transport to the disk in the unsteady state. The effects of coupled chemical reactions: the CE mechanism (Fleischmann, Pons) 285
Molybdenum,
enhancement in methanol oxidation by ——— modification of Pt–SPE electrodes (Wang et al.) 213

Nitrogen,
——— fixation. Part I. Nitrogen reduction by electrochemically generated vanadium(II) promoted by various organic ligands in basic methanol (Becker, Posin) 385
Nucleation,
two-dimensional ——— according to an exponential law with diffusion-controlled growth in the adsorption of camphor-10-sulfonate at the mercury/electrolyte interface (Philipp et al.) 159

Organic dianions,
electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated ——— and the competition between protonation and reproportionation (Ling-Chung et al.) 373
Orthogonal collecation,
electroanalytical simulations. Part IX. The simulation of a second-order chemical reaction preceding a reversible electron transfer under cyclic voltammetric conditions using ——— (Hertl, Speiser) 237
Oxygen,
epoxidation of *cis*-cyclooctene by molecular ——— electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes (Moisy et al.) 191
Reduction of ——— to water on cobalt-nitride thin film electrodes prepared by the reactive RF sputtering technique (Azuma et al.) 73

Platinum,
electrocatalysis by ad-atoms. Part XXIII. Design of ——— ad-electrodes for formic acid fuel cells with ad-atoms of the IVth and the Vth groups (Watanabe et al.) 117
Electrode kinetics of the Cu(II)/Cu(I) system at ——— in water + dimethylsulphoxide (DMSO) mixtures (Małyszko, Scendo) 61
Elimination of the influence of interfering ions in the voltammetry of catalytic hydrogen evolution in the presence of ——— salts (Korolczuk) 411
Enhancement in methanol oxidation by molybdenum modification of ———–SPE electrodes (Wang et al.) 213
In-situ IR study of adsorption and oxidation of methanol on ——— and platinised glassy carbon electrodes in sulphuric acid solution (Christensen et al.) 127
Long-range structural effects in the anomalous voltammetry on ultra-high vacuum prepared ——— (111) (Wagner, Ross, Jr.) 301
New in-situ IR results on adsorption and oxidation of methanol on ——— in acidic solution (Iwasita, Vielstich) 451
Platinum metals,
voltammetry of the complexes of the ———

with organic sulphides in acetonitrile (Murinov et al.) 95
Polypyrrole,
epoxidation of *cis*-cyclooctane by molecular oxygen electrocatalysed by ———-manganese porphyrin film modified electrodes (Moisy et al.) 191
Poly{pyrrole-CO[3-(pyrrol-1-yl)propanesulfonate]},
self-doped conducting copolymers: a charge and mass transport study of ——— (Reynolds et al.) 355
Poly-4-vinylpyridine,
chronocoulometric and rotating disc electrode determination of the charge propagation current through ——— films containing hexachloroiridate anions (Lindholm) 341
Potassium hydroxide,
chemical and electrochemical behaviour in molten alkali hydroxides. Part II. Electrochemistry of chalcogenide ions in the molten NaOH + ——— (49 mol%) eutectic mixture (Claes et al.) 327
Protonation,
electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated organic dianions and the competition between ——— and reproportionation (Ling-Chung et al.) 373

Redox-modified electrodes,
development of ——— as charge-accumulating devices for use in higher sensitivity detection systems (Chambers, Walton) 417
Redox polymer,
temperature dependence of charge transport processes in surface deposited ——— layers (Lyons et al.) 207
Reproportionation,
electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated organic dianions and the competition between protonation and ——— (Ling-Chung et al.) 373

Saul'yev algorithms,
on the use of the ——— in digital simulations of electrochemical processes (Marques da Silva et al.) 457
Second-order chemical reaction,
electroanalytical simulations. Part IX. The simulation of a ——— preceding a reversible electron transfer under cyclic voltammetric conditions using orthogonal collocation (Hertl, Speiser) 237
Selenium,
electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, Sb, Bi, S and ———) ad-atoms (Shibata, Furuya) 201
Sodium hydroxide,
chemical and electrochemical behaviour in molten alkali hydroxides. Part II. Electrochemistry of chalcogenide ions in the molten ——— + KOH (49 mol%) eutectic mixture (Claes et al.) 327
Solid polymer electrolyte,
enhancement in methanol oxidation by molybdenum modification of Pt-——— electrodes (Wang et al.) 213
Solvent monolayer,
some general statistical-mechanical considerations on the entropy of a ——— or multilayer against a charged wall (Guidelli, Foresti) 23
Structural effects,
long-rate ——— in the anomalous voltammetry on ultra-high vacuum prepared Pt (111) (Wagner, Ross, Jr.) 301
Sulphides,
voltammetry of the complexes of the platinum metals with organic ——— in acetonitrile (Murinov et al.) 95
Sulphur,
electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, Sb, Bi, ——— and Se) ad-atoms (Shibata, Furuya) 201
Electrochemical separation of the inner monolayer in methylene blue/leucomethylene blue conductive films induced by a ———-modified gold surface (Clavilier et al.) 427
Sulphuric acid,
determination of experimental parameters in the Fe(III)/Fe(II) system in 1 *M* ———, with a polycrystalline gold electrode, taking advantage of its non-linear behaviour (Duo et al.) 321
In-situ IR study of adsorption and oxidation of methanol on platinum and platinised glassy carbon electrodes in ——— solution (Christensen et al.) 127
Superoxide anion,
reaction between 1-methyl-4-phenylpyridinium (MPP^+) and ——— in acetonitrile (Oturan et al.) 83

Terthiophene,
polymerisation of ——— at controlled doping level (Eales, Hillman) 219
Thiosulphate ion,
electro-oxidation of ——— on gold. Study by means of cyclic voltammetry and Auger electron spectroscopy (Pedraza et al.) 443
Tin,
electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, ———, Sb, Bi, S and Se) ad-atoms (Shibata, Furuya) 201
Transfer coefficient,
on the nature of the ——— for ion transfer reactions (Fawcett, Foss, Jr.) 225
Vanadium,
nitrogen fixation. Part I. Nitrogen reduction by electrochemically generated ———(II) promoted by various organic ligands in basic methanol (Becker, Posin) 385
Voltammetry,
theory of microelectrode ——— with little electrolyte (Oldham) 1

Water,
reduction of oxygen to ——— on cobalt-nitride thin film electrodes prepared by the reactive RF sputtering technique (Azuma et al.) 73
